CORPORATE STORY

SUNDEK SUPREME DECORATIVE LAMINATES

SUNDEK is the pioneer of Decorative Laminates in India. Bringing your imagination to life since 1987. **SUNDEK** is known for its quality products and innovative designs with a total capacity of 1,50,000 sheets per month, a staff base of 200 employees. It is undoubtedly a world-class unit.

History: Around 1970, Late **Shri Sitaram Gupta** started trading with laminates from a factory in Kalol, Gujarat. Around 1972, he started marketing of laminates from a factory named **Visnagar Taluka Audhyogic Sahakari Mandli Ltd.** under brand name **Modlam.** In 1980, he set up a factory named **Viral Laminates Pvt. Ltd.** to make laminates for the first time in the size of 9 ft. X 3 ft.

Mr. Shashikant Gupta, Chairman and MD, son of **Late Shri Sitaram Gupta**, now at the helm of all affairs, joined this business in 1982 and started looking after production. He also established a plant at Kolkata as **Uttam Laminates.**

In 1987, **SUNDEK** India was born and started production of High Pressure Decorative Laminates. We were the pioneer of this industry and our key focus was on creativity and innovation. And the trend still continues.

Manufacturing Facility: Spread over 53000 sq. mtrs. of land, **SUNDEK** has a state-of-the art production unit located 45 km. away from Ahmedabad city. The factory is equipped with ultra modern imported machineries and best technical practices adopted from across the globe.

The production unit boasts of an ultra-modern laboratory with in-house R&D facilities that ensures continuous innovation. To attain the highest standard in quality, specially selected papers are impregnated with melamine or phenolic resins, pressed and hardened together under high temperature and pressure to ensure better bonding.

Strengths: Wide and deep routed network, teamwork and exclusive designs.

Ethical / moral and transparent way of doing business. Not just earning for oneself, but doing something for good cause of society.

Doing sales, not by talking negative about competitors but by talking about genuine positives of our company and products.

Consistent quality and excellent service.

Upcoming Projects: SUNDEK is poised for a big leap in the interior decor segment. We are soon going to offer almost all interior decor products under one roof with better technologies and enhanced customer satisfaction level.

Quality Standards: With an ever increasing client base spread across the globe, **SUNDEK'S** quality conforms to International Standards. The **Furniture Industries Research Association (FIRA)** of UK has confirmed **SUNDEK** manufacturing standards as equal to **British European Standard "BS EN 438".**

Sundek Laminates also conform to **ISI** standards. The modern laboratory set-up ensures best quality products by testing not just finished goods but even raw materials.

Awards & Accolades: The stringent quality control maintained by **SUNDEK** has earned itself a reputation & an enviable stature in the laminates industry. In India, the central government awarded **SUNDEK** with the **Top Exporters Award.** It has also received many state awards for excellence in exports.

Social Commitments: Late Shri Sitaram Gupta and Late Shrimati Shardadevi Gupta Charitable Foundation support various charitable bodies and religious organizations across India.

In **SUNDEK** Campus we have a charitable Ayurvedic Hospital for free of cost treatment.

We built a temple in the factory campus where people from surrounding villages come to worship.

Besides, we carry out lots of activities for social upliftment of the villages around our factory.

Conditions Resistant to: Boiling water, hot oil, direct heat (275°C F/135°C) phenol, mercurochrome, mild alkali, rectified spirit, ink, tea and coffee etc. without splitting, blistering, warping or disintegrating.

Care and Maintenance: Wipe clean with ordinary soap or household ammoniated liquid detergent. Abrasive cleaners and wire brushes are not recommended.

Storage / Handling: High-pressure laminate should be stored horizontally with the top face down, and a caul board placed on top in order to protect the material from damage and warping. Laminate should be protected from moisture and from contact with floors or outside walls. If you have received the laminate in roll form, unroll the laminate immediately on receipt and store only horizontally.

Pre Conditioning: Laminate and substrate should be allowed to acclimate for at least 48 hrs. in the same ambient conditions. Optimum conditions for preconditioning are approximately 75°F (24°C) with a relative humidity of 45 to 55%. Provisions should be made for the circulation of air around the components. Both laminate & the board along with backing laminate should not be containing more than 5% of moisture at the time of pasting. If the moisture in the materials is higher, dry them before pasting to avoid delamination, bubbles and other problems.

Fabrication: Cut the laminates with sharp tools and ensure clean and sharp cut without zigzag edges to avoid cracking of laminates after pasting.

Warranty Conditions: **SUNDEK** warrants that these products are free from manufacturing defects, when put to use by following our "measures for prevention" (as printed on wrapping paper on the laminate) in home and office interiors and under normal usage and wear and tear conditions. Applications requiring commercial applications, heavy wear and tear, exposure to sunlight or strong artificial lighting, high moisture or exposure to moisture for prolonged periods are not covered in this warranty. You need to purchase different grades for the same. Air bubbles appearing in bond between board and the laminate, cracking of laminate due to poor fabrication techniques or defects occurring to laminate due to usage of inferior quality of boards, adhesives are not covered in this warranty. The product must be inspected thoroughly before its use. No claim for the visual defects will be accepted / entertained if the product is cut or altered in any manner. In case of acceptance of claim **SUNDEK** will only, at it's sole discretion provide replacement of it's products supplied. Under no circumstances **SUNDEK** will be liable for labour charges and/or for other materials used in the fabrication. Our liability will be limited to the extent of the cost of product only.

Note:

- **The period of 5 years will be calculated from the date of purchase of the laminates and not from the date of installation. Production of original purchase invoice showing date from SUNDEK authorised vendor is a must to claim the warranty.**
- Samples pasted represent only colour / pattern and finish but not actual thickness. All plain colours and patterns are available in three finishes: Suede, Satin Matt and Highgloss. Rest of the finishes are available only in specific colours / patterns.
- 5000, 7000 and 9000 series and metallic designs are recommended for vertical applications only.
- **It is recommended to stick laminate while keeping the substrate horizontally. We will not be responsible for any problems if sheets are pasted vertically.**
